report on New York curb transactions, a feature that has been added recently by James A. Pollock & Co. to its private wire service, and from which it is secured for use in this department of The Herald.

Boston, Oct. 11.—Liquidation appeared this morning again and buyers were scarce. North Butte broke badly. The cheap coppers had no support at all and selling orders were almost impossible to execute. Amalgamated Copper is being "The Cactus mine," said Mr. Moffa "is full of wonders. Something new, some thing entirely out of the ordinary, is fre quently met with. At one place in the quently met with. At one place in the mine we recently encountered a mass of ore that so closely resembled some of the jig concentrates from the mill that when Manager Lafayette Hanchett was shown a saucer full of it in the office and asked what it was, he replied that it looked like the product of the No. 4 jigs. Well, the ore certainly looks as though it was a concentrate, and the beauty of it is the ore certainly looks as though it was a concentrate, and the beauty of it is that it samples 29.5 per cent copper, with a fine excess of iron over silica. I believe a carload of this material has already been sent out. How much there is of i in the mine I do not know yet."

Mr. Moffat also stated that the Tellu ride Power company was pushing matter with its power plant that is to be in stalled on the Beaver river, and the prospects of getting electric power from there during the winter now appear

WYOMING PLACER BUBBLE BURSTS WITH LOUD NOISI

Helena, Mont., Oct. 11 .- The Record to day publishes a story to the effect than umerous Montana and Washington in numerous Montana and Washington investors have been mulcted to the extent of more than a third of a million dollars through the discovery that the Red Canyon placer mines, near Lander, Wyo., had been salted and that the property is worthless. Thomas L. Greenough of Missoula and J. F. Greenough of Spokane, who were the primer man and the property is worthly started the primer man and the pri who were the prime movers in the or-ganization, have notified all investors that ganization, have notified all investors that
they will redeem all stock at the price
paid, thus assuming the loss. The discovery that the property was salted was due
to an independent examination conducted
by Speaker E. W. King of the Montana
legislature and J. R. Neill of Spokane,
heavy prospective investors, who conducted independent inspections and found that
after removing a few inches of the shaft after removing a few inches of the shaft walls the ground was valueless, as were the tailings, although all previous exper-iments showed values ranging from 20

iments showed values ranging from 20 cents to \$9 a yard.

A Chicago firm was so impressed with the future of the property that it offered the Greenoughs \$2,500,000 for their interest, but it was rejected. Water not being available, work had been started from either end of a tunnel through a mountain, so that the flow of the Pophoagie river might be utilized. The discovery has created the biggest sensation in the history of northwest mining. tory of northwest mining.

DOINGS OF UNLISTED

STOCKS ON EXCHANGE

If there were any sales of unlisted stocks yesterday they were lost in the shuffle. In the din it was possible only to pick out a few quotations, as follows: Bingham Standard, 55c bid; Ely Witch, 30c bid; Ohio Kentucky, \$3 asked; Silver King Coalition, \$4.75 asked. Copper Glance stood at 14@17c and Ohio Copper at \$3.00@ \$3.75.

Ore and Bullion,

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$110,000, as follows: Silver, lead, gold and oppea ores, \$33,000; base bullion, \$77,000.

Directors Order Distribution of Five Cents a Share on the Twenty-Fifth.

TREASURY RESERVE

JUST A YEAR SINCE LAST PAY-MENT WAS MADE.

The directors of the Mammoth Mining company met at 4 o'clock yesterday afternoon and posted a dividend of \$20,000, or 5 cents a share on the capital stock of the corporation. Books will close on the 19th and payment will be made on the 25th. It is just a year since the Mammoth company posted its last dividend. If all goes well it will not be as long "between drinks" from now on.

After the meeting Secretary Wilkinson called attention to the fact that stock in the old Mammoth company would not be entitled to the dividend. The old company went out of existence last December, when a reorganization of the company, under the laws of Nevada, was perfected. It is not meant by this that holders of the old stock will not receive the amount of the dividend ordered paid; it means only that, before they can get the money their old stock must be exchanged for the new. There is not much of the old stock outstanding and the secretary will count it as a personal favor to him if the holders of old certificates will send them to company met at 4 o'clock yesterday afterit as a personal favor to him if the hold-ers of old certificates will send them in for exchange between now and the day on which the books close on the pending distribution.

While there has been no official statement on the subject, it is understood that the company's treasury holds a surplus in excess of \$150,000, and some who profess to know declare that it is not far short of \$200,000. In addition, it is known that one of the richest streaks of gold ore ever found in the mine has been opened on the 1,300-foot level. It was reopened on the 1,300-foot level. It was reported nearly a week ago that twelve mine cars had been filled with this ore, which makes in a streak said to be eight inches thick. Some of this rock will carry over \$200,000 a ton in gold and, while no estimate is being offered by the management on what the first consignment will bring at the smelter, there is no doubt that it will be large enough to pay several such dividends as that posted yesterday.

MILL IS PLANNED FOR THE FORD HALL MINE

That the ore being taken from the rich Fort Hall mine, seven miles south of this city, is an ideal concentrating ore, and that advices as to this effect will result that advices as to this effect will result in the installation at the property of a milling plant in a short time, is the word which comes today from the general offices of the Fort Hall company in the Cook block, says the Pocatello Tribune. General Manager William M. Odell today received from the General Engineering company of Salt Lake returns on a trial shipment of ten tons of ore from the Fort Hall, which was sent to the Utah city for test treatment, to deter-Utah city for test treatment, to determine its value and to determine at the same time whether or not it was susceptible of concentration by accepted pro-

best developed and consequently one of the richest mines in southern Idaho. The success of its operation means much to the citizens of Pocatello, who should over-look no opportunity to promote its suc-

ELY MAN TELLS OF TRIP TO UTAH OIL FIELDS

Dave Dennett, an old time Elyite, arrived in town today from the new oil field at Virgin River. Utah, says the White Pine News. Dennett left here when the oil was first discovered and located some valuable property in the new fields. He is the first man from this vicinity to reis the first man from this vicinity to re-turn from Virgin river, and he has been kept busy answering questions regarding the outlook there.

According to Mr. Dennett there are great crowds of people going into the new fields and he claims to have counted as many as forty-seven teams in one day go-

The roads from here to Pioche is reported in good condition, but beyond Pioche they are very bad and teams have great difficulty in getting through. At Pioche there is much activity and it is reported that one mine has uncovered a

ported that one mine has uncovered a sixty-foot vein of ore.

Mr. Dennett has interests in this camp and as soon as he makes arrangements to have his affairs here taken care of he will return to Utah and conduct work on

will return to Utah and conduct work on his oil prospects.
While passing through the southwest corner of Utah he stopped at the farm of Hishop Joseph Judd, a brother of Hon. Thomas Judd of St. George, Utah, and while there was presented with a bunch of grapes that took the first prize at an agricultural fair in California a short time

ago.

The farm of Bishop Judd is about 250 miles from here and is renowned for the fine quality of fruit which it produces. Mr. Dennett has a quantity of grapes grown on this ranch with him and they have been much admired where shown.

WEEK'S ORE SHIPMENTS FROM TINTIC MINES

(Special to The Herald.)

Eureka, Oct. 11.—There was shipped from the mines of the Tintic district during the week ending last night a total of 145 carloads of ore, as follows: Bullion-Beck Eagle & Blue Bell
Eureka Hill
Grand Central

pany filed articles of incorporation with the county clerk yesterday. The capital stock is \$100,000, with shares at 10 cents each. The company owns claims in the Promontory district. Box Elder county. The officers are: John H. Kidd, president; William E. Headings, vice president; H. B. Stratford, secretary; J. J. Driver, treasurer.

The amount of the Utah Mine company's dividend was incorrectly stated yesterday morning. When Secretary E. M. Weiler announced the action of the board over the 'phone he was understood to say that the amount was 2 cents a share. Whether the mistake was made on his or The Herald's end of the line does not matter; it is a pleasure to say that the amount was 3 cents instead of 2 cents, making the distribution \$3,000 instead of \$2,000.
